

Press Release

15 December 2020
EdMuse Inc.
6-27-28 Shinjuku, Shinjuku-ku,
Tokyo, Japan

EdMuse CEO Will Join the First Symposium Organized by jecc and cryptomall

~Theme: “About the blockchain DX strategy at With • Post Corona”~

EdMuse Inc. Chief Executive Officer Keisuke Fukui is going to be speaking at the first symposium organized by the “Japan Estonia Chamber of Commerce” (Chairman: Hajime Ishii, hereinafter referred to as "jecc") and "cryptomall oü", which operates a social contributing shopping mall” cryptomall” that only accept cryptographic assets (cryptocurrency).

Republic of Estonia (hereinafter referred to as "Estonia") is one of the Baltic States, a republic in Northern Europe that was founded in 1918 as an independent state from the Russian Empire. Since a large-scale cyberattack to Estonia in 2007, the government has started the development and implementation of blockchain technology at the national level as part of their security measures.

Estonia is said to be one of the most successful IT countries in the world, by which 99% of its administrative services have already been digitalized. Except for marriage registration, divorce registration and real estate transactions, almost all the other administrative procedures can be completed online, which is why Estonia is now called the "the most advanced digital society in the world.”

The symposium will be a hybrid event held online and offline based, and in the first part, eight speakers will give presentations on the theme of “About the blockchain DX strategy at With • Post Corona”. In the second part, cryptomall oü, a startup company from Estonia, will make a presentation on its global patent application “Cryptomall Authentication System®.”
